

# COUNTY SOCIAL, BUSINESS AND ECONOMIC TRENDS IN HAWAII

**1990 - 2014**

**December 2015**

This report presents annual statistics on social, business and economic trends for the State and each of its four counties, from 1990 to 2014.

DBEDT published a number of reports on county trends in the past

- *Statistical Report 116, County Trends in Hawaii Since 1960* (1976); and
- *Statistical Report 224, County and District Trends in Hawaii, 1991* (January 1992).

This report is the seventh in the resumed annual series:

- *County Social, Business and Economic Trends in Hawaii: 1990 – 2006* (December 2007);
- *County Social, Business and Economic Trends in Hawaii: 1990 – 2007* (December 2008);
- *County Social, Business and Economic Trends in Hawaii: 1990 – 2008* (December 2009);
- *County Social, Business and Economic Trends in Hawaii: 1990 – 2010* (December 2011)
- *County Social, Business and Economic Trends in Hawaii: 1990 – 2011* (April 2013)
- *County Social, Business and Economic Trends in Hawaii: 1990 – 2013* (December 2014)

The present report consists of seventy-six statistical series selected to track major social, business, and economic trends in the State and its counties. Only those available at the county-level on an annual basis were considered. Many related statistics were omitted, for example, if available only from the decennial population census or the quinquennial economic census. Also excluded were statistics compiled for the State only or limited to a single county. For county-level data on a monthly or quarterly basis, the reader is directed to the “Monthly Economic Indicators” <<http://dbedt.hawaii.gov/economic/mei/>> and the *Quarterly Statistical & Economic Report* (QSER) <<http://dbedt.hawaii.gov/economic/qser/>> respectively. Other annual data may be found in the *State of Hawaii Data Book* <http://dbedt.hawaii.gov/economic/databook/>.

H-5. Recipients of temporary assistance to other needy families	88
H-6. Average monthly number of individuals served by the food stamp program	89
H-7. Motor vehicles registered	90
H-8. Actual index offenses known to the police	91

## Introduction and Overview

---

Between 1990 and 2014, Hawaii resident population grew at an average annual rate of 1.0 percent. The City & County of Honolulu experienced slower growth at 0.7 percent a year, Hawaii and Maui counties grew at 2.0 percent, while Kauai County grew 1.3 percent per year. Due to the difference in growth, by 2014, Honolulu County accounted for 69.9 percent of the state resident population, down from 75.3 percent in 1990. Hawaii County gained population share from 10.9 percent in 1990 to 13.7 percent in 2014. Maui County also gained population share, from 9.1 percent in 1990 to 11.5 percent in 2014. Kauai County's population share increased slightly from 4.6 percent in 1990 to 5.0 percent in 2014.

Civilian labor force grew slower than the resident population. The statewide labor force increased by 117,300 persons from 1990 to 2014, or 0.8 percent annual average increase. Honolulu experienced the slowest increase at 0.5 percent a year. Hawaii County grew at the highest rate or 1.7 percent per year, followed closely by Maui County at 1.5 percent, and Kauai County at 1.2 percent a year.

There was an increase of 94,350 total wage and salary jobs 1990 to 2014 or 0.7 percent annual average growth. County level data on agriculture jobs are not available beyond 2011. Non-agricultural wage and salary jobs statewide during the 1990 to 2014 period showed an increase of 96,900 jobs or 4,000 per year. Honolulu County gained 50,900 jobs, or 2,100 jobs per year, followed by Maui County (23,000 jobs, or 1,000 jobs per year), Hawaii County (18,000 jobs, or 800 jobs per year), and Kauai County (5,300 jobs, or 200 jobs per year).

Over the 1990-2014 period the number of jobs in the statewide non-agricultural private sector showed an average increase of 0.7 percent, while in Honolulu County 0.5 percent, Maui County 1.5 percent, Hawaii County 1.3 percent and Kauai County 0.8 percent.

It is interesting to note that there were structural changes in non-agricultural industry sectors among the counties during the past twenty-four years. All counties experienced decline in manufacturing jobs during the 1990-2014 period. Due to the boom in construction activity in the mid-2000s, statewide construction jobs peaked in 2007 with 39,100 jobs. In 2008, construction jobs declined statewide by 1,250 from 2007, and further by 6,250 between 2008 and 2014. Compared with the job levels in 2011, only Kauai County showed a decline (100) in construction jobs, while Honolulu grew by 1,900 jobs, Maui by 700 jobs, and Hawaii by 300 jobs.

The biggest increase in job count 1990 to 2014 was in Professional and Business Services or 32,300 jobs were added during the period. Honolulu County had the largest gain with 23,300 jobs, followed by Maui (4,000 jobs), Hawaii (3,900 jobs), and Kauai (1,400 jobs).

Total statewide personal income increased at an average increase of 4.1 percent between 1990 and 2014 and the counties from 3.8 percent to 5.2 percent. As a standard of living measure, per capita personal income increased an average 3.0 percent per year at the state level. All counties generally experienced similar nominal rates of change during this period (averaging 3.0 to 3.3

percent annually) but the state and all counties except Honolulu reflected a decline in total and the state and all counties reflected a decline in per capita in 2009. In 2014, Honolulu County per capita income was 8 percent higher than the state average in 2014 while per capita personal income for all other counties was between 75.7 percent and 87.2 percent of the state average. Hawaii County had the lowest per capita personal income over the period.

Taxable retail sales in the state totaled \$30.8 billion in 2014, representing an annual average increase rate of 3.7 percent between 1990 and 2014. Honolulu County had the largest annual average increase in retail sales at 3.9 percent, Maui County at 3.0 percent, followed by Kauai County and Hawaii County at 1.9 percent during the period. Statewide taxable services tax bases grew an average of 4.9 percent annually to \$13.5 billion in 2014 with Kauai and Maui counties growing the fastest at 5.7 percent, Hawaii County at 4.9 percent, and Honolulu County at 4.8 percent annually.

Reflecting construction activities in the state, the contracting tax base declined between 1991 and 1995, in 1997 and 1999, and 2008 to 2010 and 2014. As compared to 2007, the contracting tax base in Honolulu was 26.8 percent lower in 2010. The other three counties experienced more severe drops during the 2008-2010 recession. With the recovery in 2011, only the contracting tax base in Honolulu grew (6.0 percent). In 2011, all counties grew in 2012 (ranging from 4.6 percent for Kauai to 21.8 percent for Honolulu), in 2013 all counties but Kauai grew, and in 2014, Maui and Hawaii grew and Honolulu and Kauai declined. In 2014 the contracting tax base totaled \$7.0 billion, with \$5.6 billion in Honolulu.

The value of hotel room sales in the state (hotel rentals tax base) reached \$4.3 billion in 2014, representing a 174.3 percent increase from 1990. Kauai County had the largest increase at 190.1 percent, Honolulu at 184.6 percent, Hawaii County at 173.2 percent, and Maui County at 112.3 percent.

Net individual income tax revenues, from 1990 to 2014, grew the most in the Hawaii County (395.7 percent), followed by Maui County (250.6 percent), Kauai County (177.3 percent) and Honolulu (133.6 percent).

Visitor arrivals by air fluctuated between 6.0 to 6.9 million until 2005 when arrivals first broke the 7.0 million mark. Statewide arrivals in 2005 were 7.4 million, reached a historical level of 7.5 million in 2006, remained at 7.5 million in 2007, and slipped to 6.7 million in 2008, and to 6.4 million in 2009, rose to 6.9 million in 2010, and rebounded to 7.2 million in 2011, surged to 7.9 million in 2012, 8.0 million in 2013, and rose to a record-high of 8.2 million in 2014.

On a typical day in 2014, there were 205,433 visitors in the state. In other words, for every eight persons in the state, one was a visitor. In Honolulu County the ratio was eleven to one, Hawaii County was seven to one, Kauai and Maui counties were four to one. During 2014, Honolulu County had the highest number of visitors a day at 96,013, followed by Maui County at 55,822, Hawaii County at 30,008, and Kauai County at 23,589. All counties experienced increases in the daily visitor census between 1990 and 2014.

The number of visitor accommodation units declined (1,035 units) in Honolulu County between 1990 and 2014, while increasing in all other counties. In 2014, the number of statewide visitor units was 2,450 higher than that in 1990. Hawaii County added 1,714 units, Kauai County increased 946 units and

Maui County gained 825 units between 1990 and 2014.

Statewide hotel occupancy rate marked the highest level at 81.1 percent in 2005. It declined since then to hit 64.8 percent in 2009, the lowest level since 1990. With a fast recovery in Hawaii tourism market started in 2010, statewide hotel occupancy increased again to 77.0 percent in 2014. Oahu and Neighbor Islands showed quite different occupancy rates. While occupancy on Oahu was as high as 84.4 percent in 2014, occupancy on Neighbor Islands was much lower. Maui County showed the highest occupancy among three counties at 72.0 percent in 2014, followed by Kauai County (70.0 percent) and Hawaii County (61.5 percent).

In 2014, the average daily hotel room rate was the highest in Maui County at \$304.30 a night due to the larger number of luxury hotel rooms. Honolulu County had the lowest average room rate at \$221.18 a night. The statewide room rate increased by 138.1 percent between 1990 and 2014; the largest rise was in Kauai County at 157.2 percent, followed by Honolulu County at 137.3 percent, Maui County at 135.5 percent, and Hawaii County at 87.6 percent.

The private building permit cumulative value for the 1990 to 2014 period was \$53.6 billion statewide. 48.1 percent of the permit value was residential construction, 18.3 percent commercial construction, and the remaining 33.6 percent additions and alterations. In dollar value terms, 55.6 percent of the permits were issued for Honolulu County, 21.1 percent in Hawaii County, 16.4 percent in Maui County, and 7.0 percent in Kauai County. Note: since late 2001, only Kauai residential permits have been available for compilation.

According to the surveys conducted by the U.S. Census Bureau, Hawaii had 31,622 business establishments with payrolls in 2013. That figure represents an increase of 2,309 establishments over 1990. Maui County had the largest increase in business establishments at 1,170, followed by Hawaii County at 547 and Kauai County at 471, while Honolulu County lost 3. Establishments classified as statewide increased by 123 over the 1990-2013 period.

Of the 37,122 private employers in the state in 2014, Oahu accounted for 67.4 percent, Maui 13.9 percent, Hawaii 12.7 percent, and Kauai 6.0 percent. In 2014, all counties except Hawaii experienced increases in number of private employers compared to the prior year. About 95 percent of private employers hired fewer than 50 employees across the state and across the period.

With the closure of sugar plantations on Oahu and the Big Island and the reduction in plantations on Maui and Kauai, the value of sugar sales dropped to \$44.2 million in 2008 and 2009, about 20.7 percent of the sales value in 1990. Due to statistical reporting limitations, separate enumeration of fresh pineapple and diversified agriculture sales by county is not available beyond 2004.

Water consumption data statewide showed an increase of 6.6 billion gallons between 1990 and 2014 for an average annual increase of 9.5 percent.

On a per capita basis, water consumption 1990 to 2014 had a negative annual average growth over all geographies. Statewide showed a decline of 0.6 percent, Kauai County 1.4 percent, Maui and Hawaii counties 0.9 percent, and 0.6 percent in Honolulu.

Statewide electricity sales increased by 13.2 percent between 1990 and 2014 for an average annual 0.7 percent increase during the period. All counties experienced increases in electricity sales with Hawaii County at 50.5 percent, Maui County registering 44.9 percent, followed by Kauai County at 25.3 percent and Honolulu County at 13.2 percent. On an annual basis, however, sales declined in all geographies.

The number of registered voters increased significantly between 1990 and 2014 at 55.9 percent statewide, a rate much higher than the population growth. Maui County had the highest growth in voter registration at 99.2 percent, followed by Hawaii County at 87.9 percent, Kauai County at 54.1 percent and Honolulu at 44.8 percent.

Statewide hospital beds were relatively stable -- averaging 2,529 beds between 1990 and 2013. Honolulu and Kauai counties experienced a decrease of 304 and 13 respectively, while Hawaii and Maui counties gained 15 and 67 beds, respectively from 1990 to 2013.

In 2014, there were a total of 1,284,193 vehicles registered in the state. From 1990 to

2014, the average increase in registered vehicles was 16,462 per year, with Honolulu at 8,500 per year, Hawaii County at 3,688 per year, Maui County at 3,036 per year, and 1,239 per year for Kauai.

There was an average of 69,800 crime cases a year statewide during the 1990-2005 period. However, it decreased by 24.2 percent to 52,900 cases during the 2006-2010 period. With a further decrease in crime cases in 2011 and 2012, there were 46,797 cases total in 2012. Honolulu accounted for 67.9 percent of the state total in 2012 at 31,781, followed by Maui at 6,414 per year (13.7 percent of the state total), Hawaii County at 5,799 (12.4 percent of state total), Kauai County at 2,803 (6.0 percent). Data for Kauai are not yet available for 2013 but Honolulu increased 6.4 percent, Hawaii 6.0 percent while Maui declined 4.1 percent.

More comprehensive statistics at the single-year level can be found in the *State of Hawaii Data Book*, published annually by the Hawaii State Department of Business, Economic Development and Tourism at <http://hawaii.gov/dbedt/info/economic/databook/>

## A. Population and Housing

---

Resident population for the state grew by 27.5 percent from 1990 to 2014. Leading the growth was Maui County at 60.4 percent, followed by Hawaii County at 59.7 percent. Resident population in Kauai County grew by 36.4 percent, and Honolulu County saw the slowest growth at 18.3 percent during the same period.

Due to the difference in relative growth, by 2014, Honolulu County accounted for 69.9 percent of the state total resident population, down from 75.3 percent in 1990. Hawaii County increased population share from 10.9 percent in 1990 to 13.7 percent in 2014. Maui County also gained population share from 9.1 percent in 1990 to 11.5 percent in 2014. Kauai County's population share increased slightly from 4.6 percent in 1990 to 5.0 percent in 2014.

Statewide resident births were 18,506 in 2014, representing a decline of 9.5 percent from 1990. Honolulu and Kauai counties experienced declines in births of 14.2 percent and 5.3 percent respectively, while Hawaii

and Maui counties have increased over the period at 9.4 percent for Hawaii County and 4.8 percent for Maui County.

Total deaths in the state were 10,578 in 2014. This represents a 1.9 percent annual average increase between 1990 and 2014. In 2014, the natural population increase was 7,928 (births less deaths).

Statewide housing units increased 36.0 percent from 1990 and reached 530,106 in 2014. Hawaii County registered the highest growth at 76.5 percent, closely followed by Kauai County (72.3 percent), Maui County (69.4 percent), and Honolulu County (21.8 percent). In 1990, Honolulu accounted for 72.3 percent of the housing units, followed by Hawaii, Maui then Kauai at 12.4 percent, 10.8 percent, and 4.5 percent respectively. By 2014, Honolulu County accounted for 64.7 percent of total state housing units, Hawaii County had 16.1 percent; Maui County had 13.5 percent while Kauai County had 5.7 percent of the total.

**Table A-1.-- RESIDENT POPULATION, BY COUNTY**

Year	State	Honolulu	Hawaii	Kauai	Maui
1990	1,113,491	838,534	121,572	51,676	101,709

## B. Labor Force and Jobs

---

Civilian labor force grew slower than the resident population. State level labor force increased by 117,300 persons from 1990 to 2014, or 0.8 percent annual average growth. Honolulu County experienced the slowest growth at 0.5 percent a year. Hawaii County had the fastest growth rate at 1.7 percent per year, followed by Maui County at 1.5 percent, and Kauai County at 1.2 percent a year.

The number of civilian employed grew from 1990 to 2014 for all counties. Hawaii County at 46.9 percent experienced the highest growth during the period, followed by Maui County at 44.1 percent, Kauai County at 31.3 percent, and Honolulu County at 11.1 percent. Between 1990 and 2014, statewide employment increased at an average of 4,300 per year, 0.7 percent annual growth on average.

The Statewide unemployment rate (not seasonally adjusted) fluctuated along with business cycles during the period. The highest rate was observed in 2009 at 7.2 percent while the lowest rate was observed in 2006 at 2.6 percent. During the 1990s, unemployment rates of neighbor island counties were much higher than Honolulu County. This difference in unemployment rates reduced when the state economy was relatively good between 2000 and 2007. The unemployment rates in neighbor island counties during the period were generally less than 1.0 percentage point higher than Honolulu. However, the gap between Honolulu County and neighbor islands in unemployment rate widened again as the state economy moved into a recession. In 2008, Hawaii County registered an

unemployment rate 2.2 percentage points higher than Honolulu and in 2009, more than 4.0 percentage points higher. From 2010 to 2014, all rates declined or stayed the same - with the statewide rate at 4.4 percent in 2014, Honolulu the lowest at 4.1 percent, Maui at 4.5 percent, Kauai at 4.9 percent, and Hawaii County at 5.5 percent.

Total wage and salary jobs increased by 94,350 from 1990 to 2014, 0.7 percent annual increase or on average 3,950 more jobs every year. Compared with 1990, non-agricultural industries as a whole had 96,900 more wage and salary jobs in 2014, while the agriculture sector had 2,550 fewer jobs.

Total non-agricultural wage and salary jobs increased an average of 4,050 per year between 1990 and 2014 where more than half of that (2,100 jobs) in Honolulu. Maui County grew an average of 950 jobs, Hawaii grew 750 jobs and Kauai an average of 200 jobs annually. The share of all jobs attributed to Honolulu declined from 77.7 percent in 1990 to 73.8 percent in 2014. The focus for analysis has changed from "Total wage and salary jobs" to "Total non-agricultural wage and salary jobs" as the Department of Labor & Industrial Relations discontinued compiling agricultural jobs in 2011 and the alternative source, the National Agricultural Statistics Service compiles only statewide estimates.

Statewide, all industries experienced gains in wage and salary jobs between 1990 and 2014 except agriculture, construction, manufacturing, information, financial activities, and the federal government.

## C. Income and Tax

---

Gross domestic product (GDP) for the metro areas of Honolulu and Maui grew on average 4.7 percent annually for the period from 2001 to 2014 while GDP growth of the non-metro area was a little slower at 4.3 percent annually. This slower GDP growth reflects non-metro areas being more severely affected by the recession which started in late 2007. GDP for the non-metro area decreased about 10 percent from 2007 to 2010. In contrast, GDP for the metro area increased by 6.7 percent from 2007 to 2010.

From 1990 to 2014, per capita personal income growth was led by Kauai County at 116.7 percent, followed by Hawaii County at 110.0 percent, then Honolulu at 108.4 percent, and by Maui County at 105.5 percent. In 2014, per capita personal income in the three neighbor island counties were 19-30 percent lower than Honolulu County.

From 1990 to 2014, the average annual wage per job increased 100.4 percent statewide with the largest increase, 109.1 percent, in Kauai County, then Honolulu (102.4 percent), Hawaii (97.6 percent) and Maui (94.9 percent). The 2013 to 2014 increase was 2.7 percent statewide, and between 2.7 percent and 3.3 percent for the counties.

Taxable retail sales in the state (retailing tax base) totaled \$30.8 billion in 2014, representing an annual average growth rate of 3.7 percent between 1990 and 2014. Honolulu County had the largest annual average increase in retail sales at 3.9 percent, Maui County at 3.0 percent, followed by both Kauai County and Hawaii County at 1.9 percent over the twenty-four year period.

Statewide taxable services (tax base) sales grew an average of 4.9 percent annually to

\$13.5 billion in 2014, a greater-than 3-fold increase in the value of sales in 1990. All counties experienced over two hundred percent growth between 1990 and 2014.

Reflecting construction activities in the state, the contracting tax base declined between 1991 and 1995, in 1997 and 1999, and 2008 to 2010 and 2014. As compared to 2007, the contracting tax base in Honolulu was 26.8 percent lower in 2010. The other three counties experienced more severe drops during the 2008-2010 recession. With the economic recovery, the contracting tax base started to increase either in 2011 or 2012 in most counties except Kauai. In 2014 the contracting tax base totaled \$7.0 billion, 13.0 percent lower than the 2007 pick but 25.7 percent higher than the 2010 low.

The value of hotel room sales in the state (hotel rentals tax base) reached \$4.3 billion in 2014, representing a 174.3 percent increase from 1990. Kauai County had the largest increase at 190.1 percent, Honolulu at 184.6 percent, Hawaii County at 173.2 percent, and Maui County at 112.3 percent.

Net individual income tax revenues, from 1990 to 2014, grew the most in the Hawaii County (395.7 percent), followed by Maui County (250.6 percent), Kauai County (177.3 percent) and Honolulu (133.6 percent).

Readers should note that, though reported by county, tax base and tax revenue data are based on place of filing and do not necessarily represent the place of business. For example, the headquarters in Honolulu may file taxes for all establishments on the neighbor islands. The activity is therefore recorded as City & County of Honolulu. Tax data by place of business are not available.

## D. Tourism

---

Total visitor arrivals by air increased statewide by 1,460,141 from 1990 to 2014. However, Honolulu arrivals in 2014 were still behind the 1990 levels (5,263,964 vs. 5,176,858 or 87,106 fewer) mainly due to the decline in multiple island visitations and the increase in direct flights to the neighbor islands. Kauai experienced a decline of 165,477, while Hawaii had 274,790 and Maui had 73,582 more visitors in 2014 than 1990. Domestic visitor arrivals by air demonstrated similar trends while international visitor arrivals by air increased in Honolulu and Hawaii but declined in Kauai and Maui.

Trends in the last twenty-five years reveal that visitors visited fewer islands while in Hawaii but stayed longer on the islands they visited. This is reflected in the increase in average daily visitor census. In 2014, statewide daily visitor census was 205,433 visitors present in the islands on a typical day. That represents one visitor for every eight people in the islands. In Honolulu, it was one in eleven, Hawaii County it was one in seven, and in Kauai and Maui counties it was one in four.

Compared with 1990, all counties had a higher daily visitor census in 2014 with Maui County showing the largest increase at 18,165.

Neighbor island counties gained visitor accommodation units from 1990 to 2014 while Honolulu County lost 1,035 units during the same period. Hawaii County

gained 1,714 visitor units, Kauai County added 946 units, and Maui County gained 825 units. These gains more than offset the loss in visitor rooms in Honolulu County, making the statewide total 2,450 units more in 2014 than in 1990.

Statewide hotel occupancy rate marked the highest level at 81.1 percent in 2005. It declined since then to hit 64.8 percent in 2009, the lowest level since 1990. With a fast recovery in Hawaii tourism market started in 2010, statewide hotel occupancy increased to 77.0 percent in 2014. Oahu and the Neighbor Islands showed quite different occupancy rates. While occupancy on Oahu was as high as 84.4 percent in 2014, occupancy on Neighbor Islands was much lower. Maui County showed the highest occupancy among three counties at 72.0 percent in 2014, followed by Kauai County (70.0 percent) and Hawaii County (61.5 percent).

In 2014, the average daily hotel room rate was the highest in Maui County at \$304.30 a night due to the larger number of luxury hotel rooms. Honolulu County had the lowest average room rate at \$221.18 a night. The Statewide room rate more than doubled between 1990 and 2014, reaching \$242.63, and in all counties except Hawaii. The statewide room rate increased by 3.7 percent annually on average over the period with the largest rise in Kauai County at 4.0 percent, followed by Honolulu County at 3.7 percent, Maui County at 3.6 percent, and Hawaii County at 2.7 percent annually.

**Table D-1. TOTAL VISITOR ARRIVALS BY AIR**

[Visitors staying overnight or longer]

## E. Construction

---

Private construction, as measured by the value of building permits was \$2.1 billion in 1990, rising to \$2.2 billion in 1991. Then, construction activity declined to a little less than \$1.1 billion in 1998 before it erupted in another cycle of expansion. In 2006, the total private permit value was \$3.8 billion, a new historical high. In 2007, the private permit value decreased to \$3.6 billion, to \$2.9 billion in 2008, \$2.0 billion in 2009, fell marginally to \$1.98 million in 2010, and fell farther to \$1.9 billion in 2011. Then in 2012, there was an increase of 0.8 billion to \$2.6 billion and further to \$2.7 billion in 2013 and then dramatically rose to \$3.3 billion in 2014. Of the 2014 private-permit value, 62.5 percent (or \$2.1 billion) was for construction on Oahu, 21.0 percent (or \$697.1 million) in Hawaii County, 13.4 percent (\$443.6 million) in Maui County, and 3.1 percent (\$102.2 million) was in Kauai County.

18.1 percent of the 2014 Oahu permit value was for residential construction. However, 55.4 percent of the permit value on the Big Island was for residential construction, and

27.4 percent of the permit value in Maui County was for residential construction. Since 2002, only residential permit data are available for Kauai County.

Between 2013 and 2014, while commercial construction increased statewide by 68.1 percent, Honolulu increased by 211.5 percent, Hawaii by 44.1 percent, and Maui County, the lone decrease -- of 3.8 percent.

The remaining component, additions and alterations, increased dramatically in 2012 with a surge in installation of solar photovoltaic systems. Statewide permit value for additions and alterations increased by 73.5 percent in that year with 58.0 percent increase in Honolulu, 171.3 percent and 191.4 percent increase in the Hawaii and Maui County. This high level of additions and alteration activities abated somewhat from those high increases in 2013 to 8.9 percent statewide but rallied in 2014 with 30.8 percent growth statewide and 150.3 in Maui County, 25.2 percent in Honolulu, and 16.0 percent for Hawaii County.

**Table E-1. VALUE OF PRIVATE BUILDING PERMITS**

## F. Business & Production

---

The U.S. Census Bureau reported that in 2013, the state had a total of 31,622 business establishments. Although that was 2,309 more than in 1990, the number of business establishments fluctuated over the period reflecting the ups and downs of the state economy. Maui County added the most business establishments at 1,170 between 1990 and 2013; Hawaii County increased by 547, Honolulu County lost 3 establishments, and Kauai County gained 471 establishments during the twenty-three year period. Statewide or those establishments with no fixed location or those with unknown county location increased by 123. Compared to the prior year, the number of business establishments increased in all three neighbor island counties in 2013 while Honolulu County experienced a small decrease.

A count, conducted a little differently, by the State Department of Labor and Industrial Relations, shows the total number of private employers grew by 9,851 between 1990 and 2014. The largest gain was in Honolulu County with 5,588 more employers in 2014 than in 1990. Maui County added 2,121; the County of Hawaii gained 1,403; and Kauai County added 739 between 1990 and 2014. In terms of average annual growth rate over the period, Maui County marked the highest annual growth at 2.2 percent, followed by Kauai County at 1.7 percent and Hawaii County at 1.5 percent. Statewide in 2014, 95.0 percent of the private employers had fewer than 50 employees with the individual

counties ranging between 94.6 and 96.0 percent. The sugar plantations ended by 1997 in the counties of Honolulu and Hawaii. Though still operating in the counties of Kauai and Maui, the total value of sales declined 72.9 percent and 56.9 percent, respectively for Kauai and Maui between 1990 and 2009. The total statewide sales value was \$44.2 million in 2008 and 2009, only 20.7 percent of the sales value in 1990. In 2010, the value rose to \$69.8 million and was all in Maui County, for an increase of 132.7 percent in that county from the previous year. A statewide total for 2012 of \$73.3 million does not have county detail.

Statewide value of pineapple (fresh equivalent) sales in 1990 was \$99.3 million but declined to \$73.7 million in 2006. Due to statistical limitations the 2007 value and the county detail beyond 2004 are not available.

As an indication of diversified agriculture, the value of crop sales other than sugar and pineapple increased dramatically from 1990 to 2011. The value of sales reached \$524.8 million statewide in 2011, representing a growth of 180.1 percent between 1990 and 2011. Individual county statistics are not available after 2004 at which time the shares of the \$315.1 million sales were County of Hawaii (45.7 percent), Honolulu (26.7 percent), Maui (17.3 percent) and Kauai (10.3 percent).

**Table F-1. BUSINESS ESTABLISHMENTS**

[Statewide refers to employers without a fixed location within the State or of unknown county location]

## G. Utilities

---

Statewide water consumption increased by 2 billion gallons (2.7 percent) in 2014 from the previous year. This increase reflects Honolulu County's increase of 4.1 billion, 8.5 percent increase from water consumption in 2013. This compares to declines in consumption in Maui (1.4 billion gallons or 10.6 percent decrease), Kauai (503 million gallons or 11.3 percent decrease), and Hawaii County (150 million gallons or 1.6 percent decrease).

As compared with 1990, water consumption in 2014 decreased only in Kauai County. On a per capita basis, however, water consumption in 2014 was much less than in 1990 in all four counties. Per capita water consumption statewide was 8,898 gallons in 2014, which was 14.1 percent less than consumed in 1990. Kauai County showed the biggest decline in per capita water consumption at 29.2 percent. Per capita water consumption in Hawaii, Maui, and Honolulu County also declined by 19.5 percent, 19.3 percent, and 11.9 percent respectively over the 24 year period.

Statewide electricity sales in 2014 was 9,406 million KWH, which was 13.2 percent higher than sales in 1990, but 11.1 percent lower than sales in the peak year 2007. As

compared with 2013, all counties experienced small decreases in 2014 in electricity sales with Hawaii County at -1.3 percent, followed by Honolulu County at -1.1 percent, Kauai County at -0.4 percent and Maui County at -0.2 percent.

The number of total residential electricity customers increased to 426,862 in 2014 or by 33.3 percent between 1990 and 2014. The City and County of Honolulu gained 49,257 customers, Hawaii County added 28,233, Maui County increased by 20,175, and Kauai County had 8,982 more electricity customers in 2014 than in 1990.

Statewide utility gas sales were fairly level during the 1990 to 2014 period. Sales statewide declined 4.9 percent in the 24 year period, which is 0.2 percent decrease annually. While Honolulu County showed a modest decrease, Hawaii and Maui County showed a modest increase over the 24 year period. Unlike other counties, Kauai County demonstrated a significant change in gas sales during the period. Gas sales in Kauai almost tripled from 1990 to 2014, registering 4.3 percent annual increase on average during the period.

## H. Other

---

The number of registered voters increased significantly between 1990 and 2014 at 55.9 percent statewide, a rate much higher than the population growth. Maui County had the highest growth in voter registration at 99.2 percent, followed by Hawaii County at 87.9 percent, Kauai County at 54.1 percent and Honolulu at 44.8 percent. However, of the registered voters in the state, about 52.3 percent of them actually went to vote in the 2014 general election, a rate lower than the 61.9 percent in 2012, the 55.8 percent in 2010 and the 66.0 percent in 2008. The voting rates across the counties are between 48 and 57 percent in 2014. The voting rate was highest at 57.4 percent in Kauai County, followed by 52.8 percent in Honolulu, 52.7 in Maui County, and 47.7 percent in Hawaii County. The highest rate was 84.7 percent in Hawaii County in 1992 and the lowest was 47.7 percent in Hawaii County for 2014.

Statewide number of hospital beds were relatively stable until 2010-- averaging 2,562 beds between 1990 and 2010, but were about 10 percent lower during 2011-2013. From 1990 to 2013, Honolulu and Kauai counties experienced a decrease of 304 and 13 beds respectively, while Hawaii and Maui counties gained 15 and 67 beds, respectively.

The number of recipients of temporary assistance to needy families decreased significantly every year until 2008. Although it began to increase since then, the number of recipients in 2014 were still much lower than in 1998 in all counties. Between 1998 and 2014, Honolulu County had the largest reduction rate at 66.7 percent, followed by Kauai County (64.4 percent), Maui County (38.3 percent), and Hawaii County (37.6 percent) between 1998 and 2014.

The number of recipients of temporary assistance to other needy families also dropped significantly for all the counties, ranging from 76.3 percent in Honolulu to 92.9 in Kauai County.

The average monthly number of individuals served by the food stamp program was the highest in 1996 for the state at 129,430 individuals until 2010. From the 1996 high the number dropped to 88,848 in 2007, then rose to 193,565 in 2014, for a 49.6 percent increase from the 1996 peak, and 117.9 percent increase from the 2007 low. Maui County had the largest increase in number of individuals served from the 1996 peak in at 126.6 percent, followed by Hawaii County (71.3 percent), Kauai County (47.8 percent), and Honolulu County (32.8 percent).

In 2014, there were a total of 1,284,193 vehicles registered in the state. From 1990 to 2014, the average increase in registered vehicles was 16,462 per year, with Honolulu at 8,500 per year, Hawaii County at 3,688 per year, Maui County at 3,036 per year, and 1,239 per year for Kauai.

There was an average of 69,800 crime cases a year statewide during the 1990-2005 period. However, it decreased by 24.2 percent to 52,900 cases during the 2006-2010 period. With a further decrease in crime cases in 2011 and 2012, there were 46,797 cases total in 2012. Honolulu accounted for 67.9 percent of the state total in 2012 at 31,781, followed by Maui at 6,414 per year (13.7 percent of the state total), Hawaii County at 5,799 (12.4 percent of state total), Kauai County at 2,803 (6.0 percent). In 2014, the number of crime cases increased 6.4 percent in Honolulu and 6.0 percent in Hawaii while it declined 4.1 percent in Maui.

Kauai County includes Niihau. State as shown includes overseas ballots not attributable to an individual county. The sum is higher therefore by 8 overseas ballots in 1990, 89 in 1992, 76 in 1996, 459 in 2004, 237 in 2006, 827 in 2008, 79 in 2010, and 476 in 2012. In 2000 and 2002, State does not equal the sum of the counties although each is correct as extracted .
